PODCAST STUDIO

AUDIOBOOK PACKAGE

Bring your book to life!

AUDIOBOOK PRODUCTION

We are a real production studio with real audio engineers that can produce high quality audiobooks.

We know that **75%** of listeners use headphones, and on headphones, all the details like uncontrolled breaths, lip/mouth sounds, louds esses, unbalanced audio are easily noticeable and can negatively affect the listening experience.

With us, everyone focuses on what they do best. Our narrators will focus on recording a great performance and then in our studio, we go through the recordings word by word for detailed edits, loud breath control, noise reduction, add music to the opening and closing credits files and master the audio to meet the industry requirements so the audiobook doesn't get rejected by any platform.
